

MOHANNAD HYASAT

Data Engineer | BI & Data Warehousing

Tla Al-Ali, Amman, Jordan • (+962) 796 178 568 • Hyasat.mohannad@gmail.com • linkedin.com/in/mohannad-hyasat
Nationality: Jordanian • Date of birth: 15 May 2001 • Visa: Requires Highly Skilled Migrant sponsorship
Languages: English (Fluent, professional working) • Arabic (Native)

PROFESSIONAL SUMMARY

Data Engineer with experience delivering large-scale national data infrastructure across the public and private sectors. Led the design and delivery of a centralized government data warehouse consolidating 35+ entities in two months, now adopted as the country's primary data platform. Microsoft-certified in Azure Data Engineering and Power BI, with hands-on experience across SQL Server, Oracle, SSIS, and end-to-end ETL design. Looking to bring this experience to a data engineering role in the Netherlands.

WORK EXPERIENCE

Ministry of Digital Economy and Entrepreneurship (MoDEE)

May 2025 – Present

Data Engineer | Amman, Jordan

- Led the end-to-end design and delivery of a centralized national data warehouse, consolidating and cleansing data from 35+ governmental entities into a single, governed platform. Delivered in two months, replacing a two-year initiative that had been scrapped, and now being adopted as the primary national data infrastructure in place of an external vendor solution that was shut down.
- Co-designed and implemented a data warehouse for the Jordan Integrity and Anti-Corruption Commission (JIACC), enabling cross-entity analytics and investigative reporting across multiple government bodies.
- Built end-to-end ETL workflows, data quality checks, and discrepancy reports for the JIACC warehouse, standardizing key identifiers across sources and delivering trusted KPIs to senior decision-makers.
- Designed and maintain scalable ETL pipelines using SSIS to integrate data from governmental source systems, ensuring consistency and reliability across platforms.
- Write and optimize complex SQL queries and stored procedures for data extraction, transformation, and validation across Oracle and SQL Server environments.
- Refactored legacy Alteryx workflows into streamlined SSIS packages, significantly improving performance, maintainability, and long-term reliability.
- Engage directly with public-sector entities to gather requirements, enforce data governance standards, and deliver data products supporting national digital transformation initiatives.

Key Tools & Technologies: SQL Server, Oracle DB, Oracle TimesTen, GoldenGate, SSIS, Alteryx, Power BI, T-SQL, PL/SQL

Pure Analytica

Sep 2024 – Feb 2025

BI & Data Engineer | Amman, Jordan

- Designed and delivered a 13-dashboard diagnostic analytics solution for Airport International Group (AIG), covering the full airport commercial footprint across duty-free, retail, departures, arrivals, and external zones. The solution decomposed sales fluctuations into organic drivers (passenger traffic, flight destinations, gate allocations, customer behaviour, seasonality, holidays) and non-organic drivers (discount activity, penetration ratio shifts), giving leadership a clear, data-backed view of what was actually moving revenue.
- Built a 360-degree balanced scorecard data mart for AIG, centralizing KPIs across financial, commercial, and operational dimensions to support cross-functional performance tracking at senior management level.
- Developed ETL pipelines aggregating data from multiple sources, ensuring consistency and accuracy across sales metrics and reporting layers.
- Translated business requirements into scalable Power BI solutions across multiple client engagements, aligning technical delivery with strategic objectives.

Clients: Airport International Group (AIG), Cairo Amman Bank, Independent Election Commission, Retail Groups, UNDP, GIZ

Pure Analytica

Jun 2024 – Aug 2024

Data Science Intern | Amman, Jordan

- Supported data gathering, cleaning, and statistical analysis across active projects, surfacing trends and insights for senior team deliverables.
- Built Power BI dashboards and visualizations to communicate findings to stakeholders.

EDUCATION

Princess Sumaya University for Technology

2019 – 2024

Bachelor's Degree in Information Technology, Major: Software Engineering | Amman, Jordan

Specialized in data science with a focus on Python, SQL, machine learning, and data visualization using Power BI. Equivalent to a Dutch HBO Bachelor's degree (per Nuffic diploma comparison).

CERTIFICATIONS

Microsoft Certified: Azure Data Engineer Associate

Aug 2024

- Expertise in designing scalable data storage, building data processing pipelines, and monitoring and optimizing data platforms on Azure.
- Hands-on with Azure Data Factory, Synapse Analytics, Databricks, Data Lake Storage, Stream Analytics, and Event Hubs.

Microsoft Certified: Power BI Data Analyst Associate

Nov 2024

- Data modeling, DAX-based analytics, and delivery of interactive dashboards aligned with stakeholder objectives.

SKILLS

Data Engineering	ETL/ELT Design & Development, Data Warehousing, Data Modeling, Pipeline Architecture, Data Quality & Governance
BI & Visualization	Power BI, DAX, Dashboard Design, Diagnostic & Descriptive Analytics, Balanced Scorecard Reporting
Databases	SQL Server, Oracle DB, Oracle TimesTen, T-SQL, PL/SQL, SAP B1, HANA
Integration Tools	SSIS, Alteryx, GoldenGate
Cloud (Azure)	Azure Data Factory, Synapse Analytics, Databricks, Data Lake Storage, Stream Analytics, Event Hubs
Programming	Python, Object-Oriented Programming
Stakeholder & Delivery	Requirements Gathering, Cross-functional Collaboration, Problem Solving, Critical Thinking
